Sandalwood Farming Investment Opportunity

Shree Shayam Sandalwood Farming

Overview

Invest in Sustainable Sandalwood Farming in Bangkok, Thailand

We are excited to offer an exclusive opportunity to invest in Shree Shayam Sandalwood Farming, where we have been cultivating sandalwood on 1500 acres of prime farmland in Bangkok. With our first harvest ready in the next five years, we are expanding and inviting investors to join us in a new 150-acre project.

Why Invest in Sandalwood?

Lucrative Market:

Sandalwood is a rare and highly sought-after commodity, with its price consistently appreciating over the years.

Sustainable and Ethical:

We practice sustainable harvesting, ensuring the preservation of this valuable resource for future generations.

High Returns:

Each tree produces between 15-20 kg of sandalwood. The current price is around $150/kg and is expected to rise to $200/kg by the time of harvest.

Benefits of Sandalwood

- **Valuable Essential Oil**: Sandalwood is highly valued for its essential oil, used in high-end perfumes, cosmetics, and medicinal products.
- **High Demand in Markets**: India, China, and many Western countries have increasing demands for sandalwood in various industries.
- **Cultural and Religious Significance**: Sandalwood holds significant cultural value, especially in Asia, being used in spiritual ceremonies and rituals.
- **Long-Term Market Growth**: With its applications in alternative medicine, skincare, and aromatherapy, the demand for sandalwood is projected to grow.

Investment Highlights

- Land Cost: $30,000 per acre
- Maintenance Cost: $60,000 per acre (from plantation to harvest)
- Sandalwood Trees per Acre: 200 trees
- Harvest Yield: Each tree produces 15-20 kg of sandalwood

Return on Investment (ROI) Calculation

Investment Per Acre	Projected Returns Per Acre
$30,000 (Land) + $60,000 (Maintenance)	$90,000 Per Year
Expected Return On Investment	
$350,000 - $800,000	
Total Projected Return: $860,000 per acre (12-14 Years)	Profit Sharing: 70% Investors and 30% Company

Why Sandalwood Investment is Better than Other Investment Options

Investment Type	Before Tax Returns
Sandalwood Agricultural Income	**30%-50%**
Residential Rental Income	5%-8%
Commercial Rental Income	4% - 8%
Mutual Fund	8% - 14%
Fixed Deposit	6% - 8%

Tangible Asset Growth: Unlike cash investments, sandalwood and land value typically rise with inflation, ensuring your money is protected.

Sustainable and Ethical: A growing focus on sustainable investments means investing in sandalwood farming is a green, responsible, and highly profitable choice.

Sandalwood Farming: A Green, Profitable Future

By investing in our project, you are contributing to sustainable farming practices while securing significant financial returns. The sandalwood trees we grow not only offer economic value but also contribute positively to the environment.
